In this evolution worksheet, students review the ideas expressed by Darwin, gene pools, genetic variation, single-gene and polygenic traits, and natural selection. This worksheet has 9 fill in the blank, 5 multiple choice, and 3 matching...

### **Genetic Variation Within Population Lesson Plans ...**

Chapter 16 Evolution of Populations 16-1 Genes and Variation Darwin's original ideas can now be understood in genetic terms. Beginning with variation, we now know that traits are controlled by genes and that many genes have at least two forms, or alleles. We also know that individuals of all species are heterozygous for many genes.

### **Chapter 16 Evolution of Populations Summary**

Worksheet 17.1: Genes & Variation (pages 482-486; iBooks pages 819-828) For Questions 1-4, complete each statement by writing the correct word or words. 1. Natural selection works on an organism's ! rather than its ! . 2. A(n) ! consists of all the genes, including the alleles for each gene, that are present in a population. 3.
